Personal Services

Transportation

I can take you to visit loved ones, friends, to doctor appointments or to go grocery shopping. If you would like to have something delivered to a friend, relative or business, I can do that too.

If you want to attend your grandchild's soccer game or concert, I can take you and stay with you through the event. Who wants to go alone? No one!

Home Visits

I can help you at your home after a hospital stay, make you meals or just stop by and check in. If you want someone to sit down and eat with you, I can do that! I can make the meal, bring it to your house and break bread with you. If you're just looking for companionship or if you have a parent or child that needs a visit or delivery, I can do the same for a person of your choosing.

Handyman

I can change lightbulbs, do light gardening. Need a spot painted or a window opened, I can do that!

Chef Extraordinaire

Don't feel like cooking or need a home made pie for that family dinner? How about a picnic? I can make you something to take to the picnic. If you're

having a friend or friends over, I can make the meal. If you just don't feel like cooking on a Friday, call me to schedule a meal delivery.
